Industry Restart Guidelines
Indoor Entertainment Venues (including Cinemas, Performing Arts and Music Venues)

January 2021
Current restrictions on indoor entertainment venues (including cinemas, performing arts and music venues)

All businesses need to know their obligations and ensure they understand the current restrictions in place throughout Victoria.

Victoria moved to COVIDSafe Summer restrictions from 11:59pm on Sunday 6 December 2020, and updates were made to the restrictions from 5:00pm on Thursday 31 December 2020. These restrictions will be reviewed regularly, to ensure they reflect current public health advice. You must stay up to date with any changes for your industry.

Industry Restart Guidelines have been prepared to assist workplaces to operate safely, in accordance with the changing of restrictions, while ensuring the public feels confident that their health and safety is being protected. Workplaces covered include indoor entertainment venues, including: venues engaged in cinema (including single-screen and multiplex cinemas), professional sport and racing; and venues providing or producing theatrical performances, dance performances, musical performances and comedy shows, such as theatres, music venues and auditoriums.

Under directions issued under the Public Health and Wellbeing Act, all Victorian workplaces in this industry must abide by the following restrictions, effective from 11.59pm 6 December 2020.

These restrictions may be updated at any time based on the latest public health advice. You must stay up to date with any changes for your industry.

### Current restrictions

**Open with COVIDSafe requirements**

<table>
<thead>
<tr>
<th>COVIDSafe Plan</th>
<th>Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>• All workplaces with onsite operations must have a COVIDSafe Plan.</td>
<td></td>
</tr>
<tr>
<td>• Home-based businesses must also have a COVIDSafe Plan.</td>
<td></td>
</tr>
</tbody>
</table>

**Theatres, cinemas, music and concert halls, auditoriums, arenas and stadiums**

• Permitted to operate with 75 per cent of the total seated space, with a patron cap of 1000 people (whichever is smaller). All seated activities must be ticketed. Note, large venues may have more than one seated space. Venues should maintain the required density quotient in entry and egress points, where possible.

• Non-seated space within these venues are subject to a density quotient of one person per two square metres, if using electronic record keeping (e.g., QR Code systems), or one person per four square metres if using paper-based record keeping.

• Venues with more than 500 capacity must publish their COVIDSafe Plan online.

• Maximum of 50 people on each dance floor, subject to a density quotient of one person per four square metres.

**Nightclubs**

• Electronic record keeping (e.g., QR Code Technology) must be used for all patrons entering the venue, with a density quotient of one person per two square metres permitted.

• Maximum of 50 people on each dance floor, subject to a density quotient of one person per four square metres.

**Live music and performance**

• The capacity restrictions for live music are determined by the venue type. For example, live music held in seated music and concert halls must abide by the restrictions for these venues (outlined above), while live music held in a hospitality venue is also subject to the [Hospitality Guidelines](https://www.coronavirus.vic.gov.au/guidance-sectors).

• Where possible, performances should be outdoors or in a well-ventilated space.

• A maximum of 50 people are allowed on the dance floor, subject to density quotient of one person per four square metres.

• Additional information regarding live performance venues is provided at the end of this document.

**Karaoke**

• Permitted to open with the mandatory use of electronic record keeping (e.g., QR Code Technology) and subject to a density quotient of one person per four square metres.

• Maximum of 50 people on each dance floor, subject to a density quotient of one person per four square metres.

**Capacity (cont)**

Arcades, escape rooms and bingo centres:

- Venues are open subject to a density quotient of one person per **two** square metres, if using electronic record keeping (e.g., QR code system), or one person per **four** square metres if using paper-based record keeping.
- A maximum of 50 people are allowed on the dance floor, subject to density quotient of one person per **four** square metres.
- Venues with more than 500 capacity must publish their COVIDSafe Plan online.

**Dining areas:**

**Record keeping**

For all Victorian workplaces:

- Employers must keep a record of all workers and visitors who attend the workplace for longer than 15 minutes, including first name, contact number, date and time of visit and areas of the workplace visited.
- Employers are strongly recommended to use electronic record keeping for this purpose. This includes the [Victorian Government's QR Code Service](https://www.coronavirus.vic.gov.au/qrcode).
- Employers must keep records to show compliance with directions in force including all logs created during the time of directions being in force, work premises rosters, time and attendance records and payroll data.

For casino, gambling machine areas, nightclubs and karaoke workplaces:

- Electronic record keeping (e.g. QR codes) must be used for all patrons entering the venue.

**Face masks**

- Face masks must be carried at all times.
- Face masks must be worn when in indoor spaces (other than private residences), on public transport, and in commercial passenger vehicles, apart from when eating or drinking, unless a lawful reason not to wear one applies. Masks are strongly recommended in the home if people other than your immediate household are present.
- Face masks are strongly recommended outdoors whenever physical distancing of 1.5 metres from others cannot be maintained.
- Further details on mask wearing requirements are available [here](https://www.coronavirus.vic.gov.au/qrcode).

**Signage**

For all Victorian workplaces:

- Where a workplace has a publicly accessible space, employers must display signage at each public entry to each indoor and outdoor space, indicating maximum capacity, face mask restrictions where required, COVIDSafe hygiene and physical distancing requirements.

**Cleaning**

For all Victorian workplaces:

- Employers should ensure shared spaces and public spaces are cleaned with disinfectant regularly, with high touch surfaces cleaned twice each day. Shared equipment should be cleaned between uses.

Last updated: 2 January 2021

Six COVIDSafe Principles

All work premises must have a COVIDSafe Plan (see Creating a COVIDSafe Plan). A COVIDSafe Plan applies the six COVIDSafe Principles and sets out actions to help prevent the introduction of coronavirus (COVID-19) in the workplace. Display COVIDSafe signage in appropriate, high visibility locations.

1. Ensure physical distancing
All people in the workplace should be at least 1.5 metres apart and there should be no overcrowded areas. This means:
• Work from home if you can. Employers must permit their workers to work from home if their work can be done from home
• Ensure workers and customers are 1.5 metres apart at all times. Where this is not possible, the duration of the close contact should be minimised
• Ensure the workplace abides by the relevant density quotient
• Limit the total number of workers and customers in an enclosed area
• Avoid carpooling where possible

2. Wear a face mask
Face masks must be carried at all times in Victoria. Face masks must be worn:
• in indoor spaces (other than private residences), apart from when eating and drinking
• on public transport and commercial passenger vehicles (e.g., taxis and ride share)
Face masks do not need to be worn if a lawful reason not to wear one applies. Masks are strongly recommended in outdoor settings where 1.5 metres physical distancing cannot be maintained, and when in the home if people other than your immediate household are present.

3. Practise good hygiene
Operators must regularly clean high touch-surfaces and encourage good hygiene practices by workers and customers. This means:
• Schedule regular cleaning and disinfecting of high-touch surfaces (including all surfaces and handrails) and make gloves available for this purpose
• Encourage regular handwashing by workers and customers, and make soap and hand sanitiser available for all workers and customers throughout the workplace

4. Keep records and act quickly if workers become unwell
Have a strict policy that any workers who feels unwell must stay at home. This means:
• Support workers to stay home and get tested even if they only have mild symptoms
• Have a plan in place to immediately close down for cleaning and contact tracing if there is a confirmed case of coronavirus (COVID-19)
• Keep records of workers and customer details for contact tracing
• Ask workers to complete a pre-shift declaration (recommended)

5. Avoid interactions in enclosed spaces
Where possible, move activities to an outdoor area. This includes:
• Meetings
• Lunch breaks
• Customer registration

6. Create workforce bubbles
Limit the number of people that workers are in prolonged close contact with. This means:
• Keep pools of workers rostered on the same shifts
• Avoid overlap in shift changes
• Limit or decrease the number of visitors or workers attending multiple worksites where possible.
Creating a COVIDSafe workplace: Theatres

All work premises must ensure they apply the six COVIDSafe Principles to help prevent the introduction of coronavirus (COVID-19) in the workplace.

Display signage at each public entry to each indoor and outdoor space that meets current signage requirements (see Current Restrictions page at the start of this document)

Air conditioner set to optimum air flow at the start of each work day

Face mask requirements
Adhere to current face mask restrictions (see Current Restrictions page at the start of this document). You must also adhere to specific face mask or other PPE guidelines for your industry

Provide hand sanitiser at entrance to seated areas

Distance from audience
Performers are recommended to be at least five metres from the audience where practical.

Group bookings
Physical distancing is recommended. Consider group bookings and seat accordingly.

Hair and makeup
Recommended to maintain at least 1.5 metres between hair and makeup stations. For further information see the hair and makeup checklist.

Cleaning and disinfecting schedule
Implement and display a cleaning schedule so it is easily accessible to workers.

Cleaning fabric chairs
Ensure all chairs are cleaned after each patron use. See practise good hygiene for more information.

Floor markings to reinforce physical distancing

Food and drink
Food and drink facilities must operate under the restrictions outlined in the Hospitality Guidelines.

Performance timings
A minimum interval of 30 mins between performances is recommended, to minimise crowds in waiting areas, lobbies and restrooms.

Limit tickets sold
Ensure the number of tickets sold for each theatre performance aligns with the relevant density quotient or capacity limit (see p 3). Limit walk-in or door sales.

For the latest information on restrictions in Victoria, visit: https://www.coronavirus.vic.gov.au
Creating a COVIDSafe workplace: Cinemas

All work premises must ensure they apply the six COVIDSafe Principles to help prevent the introduction of coronavirus (COVID-19) in the workplace.

Face mask requirements
Adhere to current face mask restrictions (see Current Restrictions page at the start of this document). You must also adhere to specific face mask or other PPE guidelines for your industry.

Limit tickets sold
Ensure the number of tickets sold for each theatre performance aligns with the relevant density quotient or capacity limit (see p 3). Limit walk-in or door sales.

Group bookings
Physical distancing is recommended. Consider group bookings and seat accordingly.

Have separate entrances and exits where possible to minimise congestion

Cleaning fabric chairs
Ensure chairs are cleaned after each patron use. See practise good hygiene for more information.

Food and drink
Food and drink facilities must operate under the restrictions outlined in the Hospitality Guidelines.

Display signage at each public entry to each indoor and outdoor space that meets current signage requirements (see Current Restrictions page at the start of this document)

Floor markings to reinforce physical distancing

Air conditioner set to fresh air at the start of each work day

Hand sanitiser easily available

For the latest information on restrictions in Victoria, visit:
https://www.coronavirus.vic.gov.au
1. Ensure physical distancing

Physical distancing remains one of the most effective ways of minimising the spread of coronavirus (COVID-19) and is a vital part of creating a safe working environment.

Employers should implement physical distancing measures to create a COVIDSafe workplace. This means keeping a minimum distance of at least 1.5 metres between workers and visitors, where industry practices allow.

Density quotients apply to the number of people who can be in a venue or facility at the same time (see the ‘Current Restrictions’ table in this guideline).

Where a business has publicly accessible space(s), the business must display a sign at each public entrance to each space that specifies the maximum number of members of the public that may be present in the space at a single time. For additional information on calculating your density quotient, visit: Two, four and eight square metre rules

Ensuring physical distancing in your workplace

**Worker breaks**
Spread out break times to reduce the number of workers using communal facilities at the same time. Encourage workers to take breaks outdoors.

**Minimise contact**
Remove excess chairs and tables from communal break areas to encourage workers to maintain a minimum of 1.5 metres from one another.

**Maintain physical distancing**
Provide physical barriers to ensure physical distancing is maintained; consider installation of sneeze guards between operational areas or desk spaces between workers; and separate entry and exit points if practicable.

**Training for workers**
Provide all workers with training and guidance on physical distancing expectations while undertaking work tasks and socialising during breaks.

**Provide site inductions**
Establish appropriate site induction and training materials to inform workers of relevant coronavirus (COVID-19) risk management policies and procedures.

**Ticket booths**
Examine the entrance to the venue and consider whether to make modifications such as installing transparent shields or other physical barriers to protect workers at the ticket booth.

**Work from home arrangements**
Develop and provide workers with IT related guidance to enable remote working arrangements, including connecting to the internet, use of VPN services, accessing relevant software and utilising platforms to facilitate virtual collaboration.

**Implement virtual meetings**
Pre-shift meetings and training should be held virtually or in areas that allow for appropriate physical distancing between workers, preferably outdoors. Food and beverages should not be shared.

**Avoid carpooling**
Workers should avoid carpooling where possible. Employers should assist workers to find alternate transport options.

**Floor markings**
Use floor markings to provide physical distancing guides in areas that are likely to create a congregation of workers, customers or visitors (e.g. entrances and exits, counters, cashiers and break areas).

**Minimise congregation**
Consider staggering venue arrivals and departure times to reduce congestions in lobbies and elevators.
1. Ensure physical distancing – continued

Physical distancing remains one of the most effective ways of minimising the spread of coronavirus (COVID-19) and is a vital part of creating a safe working environment.

Ensure physical distancing between patrons and workers

**Maintain physical distancing**
Workers and patrons should be encouraged to remain at least 1.5 metres apart from others at all times. Pay special attention to high traffic areas, for example, toilets, lifts, escalators, food and beverage outlets.

**Use floor markings**
Implement measures such as floor markings or queuing systems and create specific pathways for movement flows for those exiting high traffic areas.

**Contain queues**
Use signage or floor markings (stickers) to encourage patrons to remain 1.5 metres apart at entry points and in queues. Implement physical barriers, such as roping, to manage high traffic areas (e.g. queuing areas).

**Monitor compliance**
Consider engaging someone to monitor compliance with physical distancing measures where appropriate.

**Manage dwell time**
Develop procedures to manage dwell times, access to equipment and area capacities.

**Booking, ticketing and seating**

**Bookings**
Encourage online and phone bookings and, where possible, limit the number of walk-in patrons.

**Implement technology**
Implement technology solutions to reduce face-to-face contact, including online ticket and merchandise sales, cashless transactions, contactless entry and replacing physical collateral with digital versions so patrons can use on their own device.

**Stagger seatings**
Consider utilising timed ticketing to stagger arrivals.

**Allocate seating zones**
Consider allocating centre seats or seats at the far end of rows first to limit the number of people needing to pass other seated patrons. Provide hand sanitiser at the entrance to seated areas.

**Grouped tickets**
Encourage group ticket purchases, like household/family blocks and seats accordingly. Where possible, seat people who are not from the same group at least 1.5 metres from other people.

**Minimise contact**
Consider airline-type loading and unloading by row numbers, or an entry system where individual seat numbers are called up to minimise people needing to pass each other within the row.
1. Ensure physical distancing - continued

Physical distancing remains one of the most effective ways of minimising the spread of coronavirus (COVID-19) and is a vital part of creating a safe working environment.

Manage the flow of patrons

**Patron flow**
Take measures or modify venues to ensure workers and patrons can enter, exit, and move around the venue safely.

**Separate entrances and exits**
Implement separate entrances and exits for patrons where possible, as well as separate walkways (with one-way flow), including consideration of seat removal to facilitate additional pathways.

**Elevators and escalators**
Use floor markings in elevator lobbies and near the entrance to escalators to reinforce social distancing and to identify where passengers should stand. Recommend and clearly display a passenger limit for elevators to allow people to remain 1.5 metres apart while inside the elevator.

**Access to amenities**
Manage access to and from amenities, such as toilets, food and beverage areas and gift shops. Anticipate times when there will be increased use of amenities and put in place measures to ensure physical distancing is maintained even during busy periods. Reconsider the need for services such as cloak rooms, merchandise or communal self-serve stations.

**Accessibility requirements met**
Ensure that accessibility requirements are accounted for when reconfiguring spaces and patron flow. Consider opportunities to facilitate access by vulnerable visitors e.g. special opening times or access to exclusive areas.

**Session times and intermissions**
Consider the value of intermissions and whether they are necessary, where possible stage shorter shows without intermissions. If the show does include an intermission:

- Require the entire row to leave to reduce the need for people to pass other seats with patrons who would normally remain seated and/or stagger departures.
- Extend the duration of the intermission so there is less of a rush and less crowding.
- Ensure physical distancing where food and beverages are served.
- Ensure sufficient numbers of staff are on hand to manage crowds safely.
- Limit queues for toilets and have adequately spaced markers floor markings to promote physical distancing.
2. Wear a face mask

Adhere to current face mask restrictions (see Current Restrictions page at the start of this document). You must also adhere to specific face mask or other PPE guidelines for your industry.

A face mask must be fitted and cover the nose and mouth to provide the wearer protection against infection. Face shields on their own do not meet these requirements. Please refer to the Department of Health and Human Services’ guidelines for further information. For the purposes of minimising environmental impact, reusable masks should be used instead of disposal alternatives where possible. Stay informed about the latest public health advice on washing your reusable masks.

Employers should encourage their workers to bring their own face mask. Where employers require employees to wear masks, there is an obligation for employers to provide a face mask if the worker does not have one. Where the work or task requires the use of specific types of face masks in the workplace, these must be provided by the employer. Where a worker seeks to provide and use their own face mask at work, an employer must ensure that it is meeting its obligations under the current Public Health Directions and the OHS legislative framework.

Employers have a responsibility to identify whether there is a risk to the health of workers from exposure to coronavirus (COVID-19) at their workplace.

Employers and workers have legal duties under the Occupational Health and Safety Act 2004. See WorkSafe Victoria for information about minimising health risks in your workplace.

Additional information

Responsibility for wearing a face mask

Responsibility for wearing a face mask rests with the individual. Employers must take reasonable steps to ensure their employees wear a face mask at all times when working at the employer’s premises, unless there is a lawful reason not to wear one.

Provide training on how to use PPE

Consider providing all workers with training/guidance on how to use PPE (e.g. face masks, face shields, gloves, etc) while undertaking work tasks and socialising during breaks.

Removing face masks to communicate

A face mask may be removed where a worker is communicating with another person who is deaf or hard of hearing, and the ability to see the mouth is essential for communication. You should maintain physical distancing of at least 1.5 metres.

Refusing service of customers not wearing a face mask

For the safety of workers and other customers, a business owner or worker can refuse service to customers not wearing a face mask when it is required for that workplace.

Display signage

When face masks are required, appropriate signage (e.g. posters) must be displayed at entrances to indicate face mask requirements. A workplace could also consider displaying signage that highlights appropriate hygiene practises for changing face masks, such as the importance of washing hands before and after changing a face mask.

Face masks recommendation for outdoor settings

Face masks are strongly recommended whenever outdoors and where it is not possible to maintain physical distancing (particularly for vulnerable people).

For additional information on face mask restrictions in Victoria, visit: https://www.dhhs.vic.gov.au/face-masks-ve-covid-19
3. Practise good hygiene

Additional hygiene measures are a priority. Business managers should review these guidelines to maintain good hygiene in their premises, and document hygiene practices in their COVIDSafe Plan.

Health and hygiene go hand in hand. To ensure the safety and wellbeing of your workers, business owners are encouraged to refer to WorkSafe Victoria, ‘How employers can use occupational health and safety (OHS) practice to plan for a pandemic’.

*The Public Health and Wellbeing Regulations 2009* set out the requirements for businesses registered under the Act. Proprietors and workers should be familiar with the Australian Standards as they relate to their premises and businesses.

**Workplace cleaning and disinfecting**

Undertake initial pre-opening comprehensive cleaning and implement an environmental cleaning schedule to ensure frequent cleaning and disinfection of high touch surfaces and bathrooms. Further advice about cleaning can be found at DHHS cleaning and disinfecting information.

**Cleaning and disinfecting schedule**

Ensure surfaces are cleaned regularly, with high-touch surfaces cleaned at least twice on each day.

**Accessible cleaning products and disinfectants**

Make cleaning products available near commonly used surfaces where possible (e.g. placing hand sanitiser near the printer/copiers, on tables and chairs, and in bathrooms).

**Reduce high touch-points**

Reduce touch points where possible, such as using contact-less payments and workplace access-cards, and using contact-less drink fountains and entry-points.

**Session times and intermissions**

Reduce the number of sessions and allow time between sessions to minimise interactions between patrons arriving and leaving and allow for additional cleaning/sanitisation. This may require breaks being extended and schedules adjusted.

**Cleaning fabric chairs**

Ensure all chairs are cleaned after each patron use where practical. For fabric chairs, clean the touch surfaces of the item that can be wiped with a damp cloth. For soft or porous surfaces like fabric or leather, seek advice from the manufacturer of the item to be cleaned about which cleaning products can be used.

**Educate workers and visitors**

Display posters on good hygiene and handwashing practices in prominent places and establish hygiene stations (with hand sanitiser) at entrances and throughout the workplace to encourage hand hygiene of workers and customers. Check information about appropriate disposal of masks and other PPE.

**Free infection control training**

Free, short, accredited training is available to help workers identify and manage the ongoing risk of coronavirus (COVID-19) infections in the workplace. Free infection control training will help businesses prepare to safely reopen and ensure their customers and workforce are protected. It is recommended that someone from each work premises completes this training.

**Hygiene tips for workers**

- Stay home if you are sick.
- Wash your hands often with soap and water or alcohol-based hand sanitizer.
- Wash or sanitize hands after making or receiving deliveries.
- Sneeze and cough into your sleeve.
- If you use a tissue, discard immediately and wash your hands afterwards.
- Avoid touching your eyes, nose or mouth.
- Avoid contact with people who are sick.
- Avoid high-touch areas, where possible, or ensure you clean your hands after.
- If you are required to wear gloves do not touch your face with gloved hands. Take care when removing gloves. Ensure you wash your hands after removing them.
- Wash your clothes as soon as you get home.
4. Keep records and act quickly if workers or customers become unwell

All businesses must keep records of every person attending the workplace and must record staff attendance and shift rosters – see below. Businesses must also have a response plan, as part of their COVIDSafe Plan, in case a person with coronavirus (COVID-19) attends their premises.

**Workplace attendance register**

Under current public health advice, all Victorian workplaces are required to establish and maintain a 'workplace attendance register' of every person who attends the workplace for a period of more than 15 minutes. This includes all workers (including sub-contractors) and any customers or visitors permitted in the workplace (including workplace inspectors).

If a worker or customer tests positive for coronavirus (COVID-19), a current and accurate workplace attendance register will allow the employer to immediately identify anyone who has been in close contact with that person within the 48 hours prior to the onset of their symptoms.

For more information regarding the definition of a close-contact, see: DHHS coronavirus (COVID-19) Information

**Maintain business records**

Under current public health advice, all Victorian workplaces must keep records to show compliance with these restrictions and must record worker movements, including rosters; time and attendance records; and payroll data.

**Pre-shift declaration**

It is recommended that workers declare in writing at the start of each shift and before entering a work premises that they are free of coronavirus (COVID-19) symptoms, have not been in contact with a confirmed case and are not currently required to self-isolate or self-quarantine.

Refer to the Staff Health Questionnaire within these guidelines.

---

If a customer or worker who is a confirmed case of coronavirus (COVID-19) has attended your business while they are infectious, you must:

- **Undertake a risk assessment**
  
  You must undertake a risk assessment to help determine what actions are required. This may include closing part or all of the work premises to allow a comprehensive clean, as well as the identification and notification of close contacts.

  For more information see the Workplace guidance for managing suspected and confirmed cases (including risk assessment template).

- **Contact DHHS and WorkSafe**
  
  - Notify DHHS of the case as per the Employer obligations in the Workplace Directions, providing it with your workplace attendance registers.
  
  - Consult with DHHS on whether the business is required to stay closed for a short period to facilitate cleaning and enable contact tracing.

  - Report the case to WorkSafe

- **Determine hot spots**

  - Determine what areas of the business were visited, used or impacted by the persons with coronavirus (COVID-19).

- **Clean the premises**

  - Close the affected area to prevent access prior to and during cleaning and disinfection.

  - Consider engaging suitably qualified personnel to clean and disinfect the area.

  - Open doors and windows to increase air circulation. Fans are not recommended.

  - The workplace should be thoroughly cleaned and disinfected before it can be reopened and workers can return to work.

  For more information, see How to clean and disinfect after a COVID-19 case in non-healthcare settings.
4. Keep records and act quickly if workers or customers become unwell – continued

Next steps: Slowing the spread

**DHHS actions**
The Department of Health and Human Services (DHHS) will liaise with operators where someone has been at the business while infectious with coronavirus (COVID-19). DHHS may request information from the operator to assist with contact tracing. DHHS may also request the operator to assist with contact tracing. DHHS will contact anyone who is identified as a close contact of the case.

**Business actions**
Work with DHHS to ensure that all appropriate preventative measures have been taken prior to reopening the business.
Provide DHHS with a list of the customers, workers and other visitors (e.g. contractors, delivery workers) who may be close or casual contacts. Employers must keep a record of all workers and visitors who attend the workplace for longer than 15 minutes over the past 28 days.
Any worker who tests positive for coronavirus (COVID-19) should remain in home isolation until they have been notified by DHHS that they are no longer required to self-isolate and have met its criteria for release. The worker should follow DHHS guidance and their employer’s policy.

**Close contacts**
Workers who are determined by DHHS as close contacts of a person with coronavirus (COVID-19) must quarantine and should not come to work for 14 days after their last close contact with the confirmed case, or until they are cleared by the department. They should watch for symptoms and seek medical assessment and testing if they become symptomatic.

**Contingency plans**
If multiple workers are directed to be quarantined and this affects operational capacity, the business will need to consider its own contingency plans for disposing of raw materials (especially fresh ingredients), any work in progress, or short shelf-life stock to ensure food safety is maintained.

**A note on privacy**
Please respect the privacy of people with a confirmed case of coronavirus (COVID-19) and treat their condition with understanding and compassion. If a worker is quarantining, check in on their wellbeing regularly and monitor their mental health.

**Additional resources**
Workers who have been required to self-quarantine after a coronavirus (COVID-19) test may be eligible to receive a one-off payment of $450 from the Victorian Government. Workers who are confirmed as coronavirus (COVID-19) positive may be eligible to receive a one-off $1500 payment from Commonwealth Government’s Pandemic Leave Disaster Payment for Victoria. Further information on coronavirus-related pay and leave entitlements can be found through the Fair Work Ombudsman at:
- Pay and Leave During Coronavirus
- Health and Safety in the Workplace During Coronavirus
5. Avoid interactions in enclosed spaces

In Victoria, employers have OHS duties and obligations to do what is reasonably practicable to provide and maintain a working environment that is safe and without risks to the health of employees.

As part of creating a safe working environment that addresses risks associated with potential exposure to coronavirus (COVID-19), businesses should have a plan in place to minimise the amount of interactions conducted indoors and maximise ventilation, air quality and use of outdoor spaces.

This means, wherever possible, moving activities outside or to well-ventilated areas and keeping doors and windows open to ensure maximum ventilation. Where activity cannot be moved outdoors, heating, ventilation and air-conditioning (HVAC) systems may have a role in decreasing the risk of transmissions in indoor spaces by increasing the rate of air change, decreasing recirculation and increasing the use of outdoor air.

Actions your business can take

**Air quality and ventilation**
Open windows and outside doors where possible to maximise ventilation. Reduce or eliminate recirculated air and increase the use of outdoor air where possible. Use air conditioning to enhance the flow of air, ensuring that the fresh air mode is selected (rather than the recirculated air function). All air conditioning and ventilation systems should be regularly inspected, maintained and cleaned.

Fans (ceiling or free-standing) which move or disperse air are suitable for use in work and industrial settings provided they are not moving air across adjacent or nearby workers. Exhaust and industrial fans may also be beneficial in hot weather when strategically placed to move heat or air outside a building. Fans should not be used in enclosed indoor spaces such as elevators. See public health advice on safely cooling your workplace.

**Air quality when cleaning**
Open outside doors and windows to increase air circulation before commencing cleaning and disinfection. Keep doors and windows open after cleaning and disinfection to allow the cleaning agents to disperse in the airflow.

**Move activities outside**
Where possible, move internal meetings and activities to an outdoor area. Encourage workers to take their lunch breaks and any other breaks outdoors as well.

**Consider steps to improve ventilation**
Work with your building owner or manager to improve ventilation indoors. Measures include increasing the percentage of outdoor air and disabling demand-control ventilation (DCV) controls that reduce air supply based on temperature or occupancy.

**Filter performance**
Monitor and manage filters in accordance with manufacturer instructions. However, upgrading HVAC systems by incorporating higher grade filters can be very expensive and is not always feasible. Further, even a high-efficiency particulate air (HEPA) filter will not eliminate all concerns about airborne transmission.

**Elevators**
Work with your building owner or manager to consider whether supplemental air ventilation or local air treatment devices should be added to frequently-used elevator cars.

**Restrooms**
Ensure exhaust fans in end of trip and restroom facilities are functional and operating at full capacity to ensure adequate air flow and ventilation.
6. Create workforce bubbles

Having ‘workforce bubbles’ can help minimise the risk of infection and support contact tracing initiatives.

A ‘workforce bubble’ is a group of workers who limit their in-person interactions to other members of the group. This strategy focuses on reducing the number of individuals a worker comes into contact with, rather than the number of interactions. Should a worker test positive or have symptoms of coronavirus (COVID-19), it will help contain the spread to a minimum number of people within the bubble, rather than requiring the entire workforce to quarantine.

To minimise possible exposure and contact, businesses should:

**Limit**
the number of people that workers have prolonged close contact with

**Modify**
processes to minimise interactions between workers during breaks or when transitioning into or out of work periods where possible

**Consult**
with workers whose work is not essential to the physical operation of the business to determine if working from home or remotely is reasonably practicable

**Review**
shift arrangements to create smaller teams and avoid mixing workers across shifts.

**Actions your business can take**

**Set up ‘pools’ of rostered workers**
Review shift arrangements to create smaller teams and have each team work independently (known as cohorting) and avoid mixing workers across shifts.

**Stagger shifts**
Stagger or increase the time between shifts to eliminate bottlenecks and avoid intermingling between different teams.

**Define work zones**
Encourage assignment of workers to specific workstations to minimise the need to go into other spaces. Limit role or task rotation where possible so that workers can remain at a single workstation where possible. If workstations need to be shared, they should be shared by the smallest possible number of people.

**Separate communal areas**
Separate communal areas such as change rooms and tea rooms per workforce bubble to minimise intermingling between different teams.

**Limit worker movement between sites**
Where possible, limit each worker’s movements to one worksite. It is recommended that employers keep a log of all employees working across multiple sites including date, time and place of attendance.

**Keep contact records**
Keep records that will help manage workforce bubbles, such as knowing which workers are in different pools, start and end times of shifts etc. Employers must keep a record of all workers and visitors who attend the workplace for longer than 15 minutes in the past 28 days.

**Volunteers**
There are currently no restrictions on volunteers attending work where they are required. Volunteers who work in public spaces should be afforded the same protections and training as paid staff. Consider the role of volunteers when preparing your COVIDSafe Plan.
Creating a COVIDSafe Plan

Every business with on-site operations, is required to complete a COVIDSafe Plan so that we can stay safe and stay open.

All businesses must have a completed COVIDSafe Plan for each workplace to continue operating in Victoria. This includes home-based businesses, and businesses that provide services in other people’s homes.

As part of a spot check by Victoria Police or other authorities, businesses must be able to demonstrate that they have an adequate COVIDSafe Plan.

If a business has an existing COVIDSafe Plan, you must conduct regular reviews to ensure it meets up-to-date requirements (e.g. on face masks).

Your COVIDSafe Plan must set out:

✓ Your actions to help prevent the introduction of coronavirus (COVID-19) in your workplace.
✓ The level of face mask or personal protective equipment (PPE) required for your workforce.
✓ How you will prepare for, and respond to, a suspected or confirmed case of coronavirus (COVID-19) in your workplace.
✓ How you will meet all of the requirements set out by the Victorian Government. Some higher-risk industries or workplaces may have additional requirements of employers and workers.

Workplaces should regularly check that they are complying with current directions and advice provided by health authorities.

Occupational Health and Safety Act

A COVIDSafe Plan forms part of the development of a safe system of work.

Workplaces should also note that the workplace health and safety obligations remain under the Occupational Health and Safety Act 2004 (OHS Act) with respect to identifying hazards and eliminate or, where is not possible to eliminate, reduce risks as far as reasonably applicable.

Workers must also comply with their obligations under the OHS Act.

For further information on your obligations under the OHS Act, please visit the WorkSafe website.

For more information about creating a COVIDSafe workplace, please visit:

• WorkSafe: Coronavirus (COVID-19)
• WorkSafe: Preparing a pandemic guide
• DHHS: Business and industry - coronavirus (COVID-19)
• DHHS: Preventing infection in the workplace
• DHHS: Workplace obligations
• DHHS: Confirmed case in the workplace
Compliance and enforcement

Venues should regularly check that they are complying with current directions and advice provided by health authorities.

Each business has an obligation to ensure that their workplace is comprehensively cleaned prior to reopening or recommencing operations. Comprehensive cleaning involves a thorough and extensive cleaning and disinfection regime with a focus on surfaces that may have been exposed to the virus.

Workplaces may consider nominating a worker to be the COVID Marshal (or similar) to oversee the implementation of the workplace’s COVIDSafe plan, ensuring that correct processes are being followed, any relevant documentation is complete, workers are trained, and procedures are kept to up-to-date to comply with current health information.

Evidence of compliance with the directions of the Victorian Chief Health Officer may be requested from a relevant compliance/enforcement officer. Victoria Police, and other authorities involved in the regulation of businesses, may conduct spot checks to ensure compliance with the directions issued under the Public Health and Wellbeing Act. WorkSafe will continue compliance and enforcement action under the Occupational Health and Safety Act 2004 (OHS Act).

Where can I find further information on safely reopening my workplace?

Business Victoria is ready to support businesses and answer questions about preparing for a safe reopening. Business Victoria can be contacted on 13 22 15 or online by the Contact Us form.

For information on health and safety requirements under the OHS Act, businesses should refer to WorkSafe Victoria’s website or contact its advisory service on 1800 136 089.

How will you enforce compliance? Who will enforce it?

Victoria Police, and other authorities involved in the regulation of businesses may conduct spot checks to ensure compliance with the directions of the Victorian Chief Health Officer.

WorkSafe will continue compliance and enforcement action under the Occupational Health and Safety Act 2004 (OHS Act). For information on health and safety requirements under the OHS Act, businesses should refer to WorkSafe Victoria’s website or contact its advisory service on 1800 136 089.

Fines and penalties

Victoria Police can issue on the spot fines of up to $1,652 for individuals and up to $9,913 for businesses for:

- Refusing or failing to comply with the emergency directions;
- Refusing or failing to comply with a public health risk power direction; or
- Refusing or failing to comply with a direction by the Victorian Chief Health Officer.

Fines can be imposed through the Magistrates’ Court to a maximum of $20,000 for individuals and $100,000 for businesses.

WorkSafe may take a range of compliance and enforcement action against an employer which fails to comply with its duties under the OHS Act.
Compliance and enforcement - continued

Venues should regularly check that they are complying with current directions and advice provided by health authorities.

Compliance and communication

✓ Communicate your venue’s COVIDSafe measures and expectations of patrons at key touchpoints, including: on your website, at the point of ticket sale and via signage on site.
✓ Consider developing a refund policy and protocols to handle groups where one member is denied entry, or patrons are not complying with restrictions.
✓ If a patron at the venue is in breach of the directions issued by Victoria’s Chief Health Officer or is not cooperating, an organisation or venue has the right to refuse entry to customers or ask them to leave.
✓ Provide front of house workers with additional resources and training to ensure high quality customer experiences that protect health and wellbeing. This includes supporting workers to effectively manage challenging conversations or patron behaviour, such as privacy issues, and providing additional resources and support for worker mental health and wellbeing.
✓ Establish a standard procedure for handling patron non-compliance or non-co-operation with safety measures.
✓ Consider a pre-performance broadcast message (like the one asking patrons to turn off their mobile phones) to remind patrons of the recommendation to wear their masks throughout the performance.

For more information and FAQs, visit: COVIDSafe Plan FAQs
Cleaning guidelines – building owners and managers

All building owners and managers should ensure their workers follow the below COVIDSafe cleaning guidance to help prevent the introduction of coronavirus (COVID-19) in the workplace.

Documentation
Consider maintaining a cleaning log and schedule that set out dates, times and frequency each area has been cleaned. If you outsource your cleaning services, the documentation should clearly specify the cleaning activities and standards expected of the service provider.

Storage
Ensure your buildings’ cleaning and laundry supply rooms are clean and workers can come in and out easily.

Clean and safe environment
It is the responsibility of the building owner or business owners to ensure cleaning is performed to the expected standard. This can be achieved by either an in-house or contracted cleaning services.

Ensure equipment, cleaning products and personal protective equipment is provided to enable best practice cleaning to be performed. Check information about appropriate disposal of masks and other PPE.

Communication
Clear lines of communication need to be set up between all parties i.e. building occupier/manager and its occupants (workers, tenants, visitors, customers) the cleaning service provider and the cleaning staff.

Risk-based cleaning
Target high use communal areas like chilled areas, kitchens and toilets that may require higher frequency cleaning with appropriate cleaning products.

Have ability to increase cleaning services in the event of a confirmed or suspected COVID-19 case.

Roles and responsibilities
Define the responsibility for each role that has a cleaning duty.

Agree who will be responsible for monitoring cleaning quality and that it meets the expected standard.

Provide workplace cleaning training for workers who have site specific cleaning duties and to support any changes in cleaning schedules.

For the latest information on cleaning guidance, visit: coronavirus.vic.gov.au
Checklist for business owners/managers

- Prepare your COVIDSafe Plan
  - Every business is required to have a COVIDSafe Plan that is regularly updated in order to reopen their workplace.

- Ensure workplace is set up to adhere to relevant limits and density quotient
  - Workplaces must adhere to the relevant capacity limits and density quotients for their industry (see current restrictions table)
  - All seating is spaced so that workers are at least 1.5 metres apart if/when seated

- Prepare a cleaning schedule
  - Business must regularly clean shared spaces and areas accessible to the public using a surface disinfectant.
  - Establish new processes and schedules for cleaning and sanitising to maintain good hygiene, including frequent cleaning of high touch points (see our Cleaning and Sanitising Fact Sheet).

- Signage requirements
  - Display signage for workers and customers in appropriate, high visibility locations, to include:
    - At workplace entrances to advise of the maximum number of customers allowed
    - Information about the symptoms of coronavirus (COVID-19) and the need to stay home when unwell
    - Hygiene and physical distancing practices.
    - Face mask restrictions where required.
  - Promote physical distancing, including between workers and customers, with floor or wall markings or signs. Use physical barriers where appropriate (e.g. installation of sneeze guards).

- Establish your record keeping
  - Record the contact details of any worker or customer who attends your workplace for longer than 15 minutes (this includes contractors and delivery workers) including: first name and a contact phone number to support contact tracing. Retain for at least 28 days following the visit.
  - Recommend collecting Staff Coronavirus (COVID-19) Health Questionnaires from workers at the start of each shift.
  - Set up a roster to ensure workers do not work across multiple sites unless impractical to do so. For those who do work across multiple sites employers should keep records of these workers.

- Consult with workers
  - Employers must, so far as is reasonably practical, consult with workers and HSRs (if any), on matters related to health or safety that directly affect, or are likely to directly affect them.
Worker and management policies, practices and training

- Ensure you as the operator or manager understand your obligations under the Occupational Health and Safety Act and have reviewed the coronavirus (COVID-19) guidance from WorkSafe Victoria available at here.
- Encourage workers to complete free infection control training and download the COVIDSafe App. It is the Government’s expectation that:
  - at least one worker at every workplace will have completed the training
  - workers should make themselves familiar with these guidelines
- Consider appointing a worker to be your COVID Marshal to ensure policies and practices are being followed, workers are trained, and records are kept. More information on the roles and responsibilities of COVID Marshals is available here.

Additional resources

For additional information about creating a COVIDSafe workplace, please refer to the following guidance:

- WorkSafe: Industry obligations
- WorkSafe: Managing COVID-19 risks – face coverings in workplaces
- DHHS: Preventing infection in the workplace
- DHHS: Preparing for a case of coronavirus (COVID-19) in your workplace
- DHHS: Cleaning and disinfecting to reduce COVID-19 transmission
- WorkSafe: Other relevant industry specific guidance
Returning to work

Please note that the checklists below outline the restrictions and requirements that are effective as at publication of this guideline.

**Checklist for workers**

- **Complete free infection control training (optional)**
  All current workers are encouraged to complete [free infection control training](#). Any new workers being engaged are also encouraged to complete this training.

- **Avoid carpooling with other colleagues, unless they are from the same household**

- **Adhere to current face mask restrictions** (see Current Restrictions page at the start of this document). You must also adhere to specific face mask or other PPE guidelines for your industry.

- **Practise good hygiene**
  - Be rigorous in maintaining the new cleaning and sanitising schedule (for example, touch points such as tables and counters need to be cleaned and sanitised before and after use by customers).

- **Wash your hands thoroughly with soap and water for at least 20 seconds at the very minimum:**
  - On arrival at work
  - Before preparing or delivering food and/or beverages to tables
  - After collecting/clearing used food and beverage items
  - Before returning to food or beverage preparation areas
  - At the start and end of each meal break
  - Before and after touching a customer or their belongings
  - After handling money
  - Before leaving work
  - After blowing your nose, coughing, sneezing, or using the toilet.

- **Avoid interacting with colleagues in enclosed spaces where possible**

- **Avoid working across multiple work sites where possible**

- **Stay home if unwell**
  - If you have symptoms, get tested for coronavirus (COVID-19). Stay in isolation at home until you get the result and it is negative for COVID-19.
  - Do not come to work if you have a fever (a temperature of 37.5°C or greater), or if you have any symptoms.
STAFF CORONAVIRUS (COVID-19) HEALTH QUESTIONNAIRE

We encourage each worker to complete this questionnaire before starting any shift and give your completed questionnaire to the shift manager for record keeping purposes.

Worker name: ________________________________________________________________

Date: ___________________________  Time of shift ___________________________

Are you currently required to be in quarantine because you have been diagnosed with coronavirus (COVID-19)?

☐ YES  ☐ NO

Have you been directed to a period of 14-day quarantine by the Department of Health and Human Services (DHHS) as a result of being a close contact of someone with coronavirus (COVID-19)?

☐ YES  ☐ NO

If you answered YES to either of the above questions you should not attend work until advised by the Department of Health and Human Services that you are released from quarantine or until your 14-day quarantine period is complete.

If you answered NO to the above questions, proceed to the symptom checklist below.

Are you experiencing any of these symptoms?

Fever (If you have a thermometer, take your own temperature. You are considered to have a fever if above 37.5°C)  ☐ YES  ☐ NO

Chills  ☐ YES  ☐ NO  Cough  ☐ YES  ☐ NO

Sore throat  ☐ YES  ☐ NO  Shortness of breath  ☐ YES  ☐ NO

Runny nose  ☐ YES  ☐ NO  Loss of sense of smell  ☐ YES  ☐ NO

If you answered YES to any of the above questions you should not enter your workplace (or you should leave your workplace, if already there). Tell your employer, go home, and get tested for coronavirus (COVID-19).

If you answered NO to all the above questions, you can enter your workplace.

If you develop symptoms, stay at home and seek further advice from the 24-hour coronavirus hotline 1800 675 398 or your general practitioner.
Additional guidance for performance venues

If you are working in the entertainment and performing arts industry, consider using the checklists below:

☐ **Cast/performers, support crew and technicians**
  - Recommend cast/performers to perform own set checks and to dress themselves, where possible.
  - Recommend performers to handle hand-held props out of a sanitised bag and return them to the same bag when finished, and clean after each use.
  - The stage/performers should be at least five metres from the audience, where practical.
  - Performers should maintain 1.5 metres distance from each other and from others.
  - Support crew and technicians should maintain at least 1.5 metres distance from each other, where possible.
  - Consider reduced numbers of performers/musicians and/or staggered arrival and departure.

☐ **Musicians and singers**
  Singing or playing wind instruments may involve the forceful exhalation of air which can allow fluids from the mouth and nose to be expelled into the air. This increases the risk of coronavirus (COVID-19) transmission.
  It is vital that singers and musicians do not attend rehearsals or performances if they are unwell. When rehearsals and performances are conducted:
  - It is recommended that singers and musicians playing wind instruments maintain two metres distance from each other and from others in the band/ensemble/orchestra.
  - All other musicians should maintain a physical distance of 1.5 metres (recommendation).
  - Consider the use of absorbent pads to manage droplets from instruments.
  - Consider the use of sneeze screens or mute shields between musicians.
  - Adhere to requirements for rehearsals, performances and equipment sharing.

☐ **Rehearsals**
  - Ensure rehearsal spaces are set up to facilitate physical distancing and avoid direct contact where possible.
  - Consider minimising attendances at on site rehearsals to essential personnel only and seek opportunities to rehearse separately or via digital means.
  - Where cast cannot adhere to physical distancing requirements, try to limit the duration of close contact and ensure good hygiene practices, such as handwashing.
  - Hand hygiene practices should be strictly followed and promoted throughout and between rehearsals.
  - Rehearsal and performance areas should be cleaned with increased frequency.
  - Minimise the length of rehearsals and performances where possible.
  - Ensure during any breaks appropriate separation is maintained.
  - Consider rehearsing in large, well-ventilated areas or even outdoors if practicable.
  - Consider reduced numbers of performers/musicians and/or staggered arrival and departure.
  - Adhere to physical distancing requirements during rehearsals where possible.
  - Limit direct person-to-person contact.
Additional guidance for performance venues

If you are working in the entertainment and performing arts industry, consider using the checklists below:

- **Equipment**
  - Consider colour code equipment (with tape/stickers) to identify when equipment has been used and needs to be cleaned before next use.
  - Consider providing additional time at the end of the day to ensure the cleaning and sanitisation of equipment used.
  - Sharing of microphones, equipment or instruments should be avoided, even between asymptomatic individuals.
  - Consider sneeze screens or mute shields between musicians and maintain physical distancing.
  - Prevent swapping of radio microphone belts and pouches between performers.
  - Clean radio microphone transmitters with disinfectant wipes.
  - Consider requiring performers to apply and remove their own lapel microphones, where their use is unavoidable.
  - Consider requiring individuals to supply their own headphones.
  - Instrument players should avoid sharing music stands where possible (as it will make physical distancing difficult).

- **Hair and makeup**
  Guidelines are available for the hair and beauty services industry, with sections that are relevant to hair and makeup in the creative sector. Please refer to these for more detailed guidance, in conjunction with the following:
    - Consider providing performers with the option to do their own hair and makeup (including touch-ups and removal), including through virtual tutorials with hair and makeup personnel.
    - Wash hands prior to beginning any work on a cast member or performer, during as needed, and immediately after.
    - Sanitise and bag hair and makeup kits (tagging kits as such).
    - Ensure makeup applicators and removal supplies are single use and disposed of.
    - Consider purchasing separate makeup kits for each cast member.
    - Prevent makeup supplies from being handled by anyone outside of the makeup department.
    - Consider requiring wigs and hair extensions to be deep cleaned before being applied.
    - Maintain at least 1.5 metres distance between hair and makeup stations.
    - Wipe down makeup chairs with disinfectant wipes between uses by different performers.
    - Place a hygiene station near the entrance of the makeup area.

- **Costume**
  - Consider providing additional time after casting to allow for online purchases, delivery and separate individual fittings.
  - Conduct costume fittings online where possible or with only one stylist/designer.
  - Clean and sanitise high-touch surfaces between fittings.
  - Ensure costume fitters and cast members wash hands before and after fitting or dressing cast.
  - Consider equipping each individual with their own supply of alcohol-based disinfectant and hand sanitiser.
  - Prevent costume pieces from being shared.
  - Consider colour coding costume pieces (with tape/stickers) to identify when a costume/piece has been used and needs to be cleaned before its next use.
Additional guidance for performance venues

If you are working in the entertainment and performing arts industry, consider using the checklists below:

- **Art department**
  - Consider minimising the number of crew who will work in groups or pairs to install or move items (where safe to do so).
  - Consider implementing permanent separate teams to minimise cross-contamination.
  - Consider planning purchases to minimise trips needed to physical stores and facilitate use of credit cards and online payment.
  - Minimise the use of shared props and wipe down shared props between rehearsals.
  - Consider colour coding props/equipment (with tape/stickers) to identify when they have been used and need to be cleaned before its next use.
  - Wipe down and disinfect goods in the prop store.
  - Maintain an inventory trail of props for the purposes of contact tracing if there is a confirmed case.

- **Theatre/performance spaces**
  - Consider limiting the number of tickets sold for each cinema screening or theatre performance to allow for requisite physical distancing and limit or refuse walk-in or door sales.
  - Consider airline-type loading and unloading by row numbers.
  - Consider utilising timed ticketing to stagger arrivals if practicable.
  - Encourage ticket purchases in groups, like household/family blocks and seat accordingly.
  - Where practical, people who are not from the same group should be seated at least 1.5 metres from other people in the venue.
  - Consider allocating spaced seating and staggering that between rows. Other seats could be clearly marked that they are not to be used.
  - Consider utilising a seating system where individual seat numbers are called up to minimise people needing to pass each other within the row.
  - If there is an intermission, consider requiring the entire audience to leave their rows to reduce need for people to pass other seats with patrons who would normally remain seated.
  - If there is an intermission, consider extending its length to reduce the need for people to feel the need to hurry and impose on physical distancing requirements.
  - Consider reducing the number of sessions and allow time between sessions to minimise interactions between patrons arriving and leaving and allow for additional cleaning/sanitisation.
  - Implement separate entrances and exits for patrons where possible, as well as separate walkways (with one-way flow) in lobby areas, including consideration of seat removal to facilitate additional pathways.

- **Hirers and touring companies**
  - Ensure all hirers, contractors and touring companies are aware of and comply with these guidelines.
