IMPROVE VENTILATION TO REDUCE THE SPREAD OF COVID-19

1. Open windows and doors where possible to maximise air flow

2. Use ceiling fans or wall-mounted air-conditioning units to increase air flow

3. Adjust the settings on heating, ventilation and air conditioning (HVAC) systems or air conditioning units to increase the proportion of outdoor air

4. Ensure regular servicing of your HVAC systems including upgrading filters

5. Consider using portable filtration units to increase the clean air and reduce the concentration of viral particles

Also recommended:

– Move activity outdoors when possible

– Avoid interactions in confined or crowded spaces
