

Extra support if you have COVID-19

People who belong to one or more of the following groups are eligible for extra support if they have COVID:

- Aboriginal and/or Torres Strait Islander people
 - People aged 80 years and older
 - People living with disability, or carers of people living with disability
 - People needing help to recover at home
 - People of refugee or asylum seeker status
 - People living in rural isolated communities.
-
- If you test positive for COVID-19, it is important to register your result at www.coronavirus.vic.gov.au/report, or call the Coronavirus Hotline on **1800 675 398**.
 - Medicines are now available for eligible Victorians who have COVID-19. These medicines can stop you from getting so sick you need to go to hospital. To see if you may be eligible and for more information, visit www.coronavirus.vic.gov.au/covid-19-medicines.
 - If you are eligible for extra support you will be contacted by the COVID Positive Pathways program.
 - The program will make sure you are cared for in the best possible place, depending on your needs. This may be at home or in hospital.
 - The program will also help connect you with other supports you may need while you are sick. This could include emergency accommodation, food relief and essential supplies, medicines and other services.
 - If you need urgent help with food or material support (and friends, family or delivery services can't help), call the Coronavirus Hotline on **1800 675 398**.
 - For more information about the COVID Positive Pathways program, see: www.coronavirus.vic.gov.au/covid-positive-pathways.
